

ClearlyIP PBX Appliance 715

The PBX 715 appliance is a small yet powerful appliance purposely built for real time communication systems. The PBX 715 appliance has been tested for 40 extensions and 10 concurrent calls.

The PBX 715 also has 1 FXO port and 1 FXS port, allowing you to connect your legacy analog devices.

FreePBX® Distro Preinstalled

FreePBX® is a web-based open source GUI that controls and manages Asterisk® (PBX), an open source communication server.

Integration with ClearlyIP SIP Trunking

www.clearlyip.com/sip-trunking/

ClearlyIP SIP trunking is a simple price based trunking platform for US and Canada customers with powerful feature set for businesses and tight integration when using FreePBX as your PBX.

Simple pricing model and instant signup and real time buying of phone numbers in your rate center.

Integration with ClearlyIP Phones

www.clearlyip.com/ip-phones/

ClearlyIP suites of IP phones can connect with your PBX 715 appliance to give you a single hardware vendor solution for your phones and PBX appliances.
